Future Skills

Find your place in IT

Daniel, fresh IT graduate

“Which part of IT is for me?”

He has the degree. He doesn't have the answer.

— PROBLEM

Problem

1

Doesn't know which IT field suits him

2

School can't guide every student 1-to-1

3

Career apps are boring

— PROBLEM

The numbers

[R2] RESEARCH NEEDED

__ %

of IT students unsure which field fits them

[R3] RESEARCH NEEDED

1 : ___

school counsellors to students

[R4] RESEARCH NEEDED

__ %

of IT graduates work outside their field

- **S** Social
- **E** Enterprising
- **C** Conventional

→

- Software Engineering
- Data & AI
- Cybersecurity
- Cloud & Networking
- Web & Interface Design

— STEP 2 OF 4 · YOUR INTEREST RESULTS

Your crew role

The Handy Navigator

You like working out how things work. You read the stars and find the route.

IT paths to look at: Data, AI, finding and fixing bugs

No role is better than another.

Your interest code (Holland code)

IRC

Find what thrills you

Daniel is a Navigator: data, AI, fixing bugs.

Nobody wants 100 questions

Other tests

Every area, every question

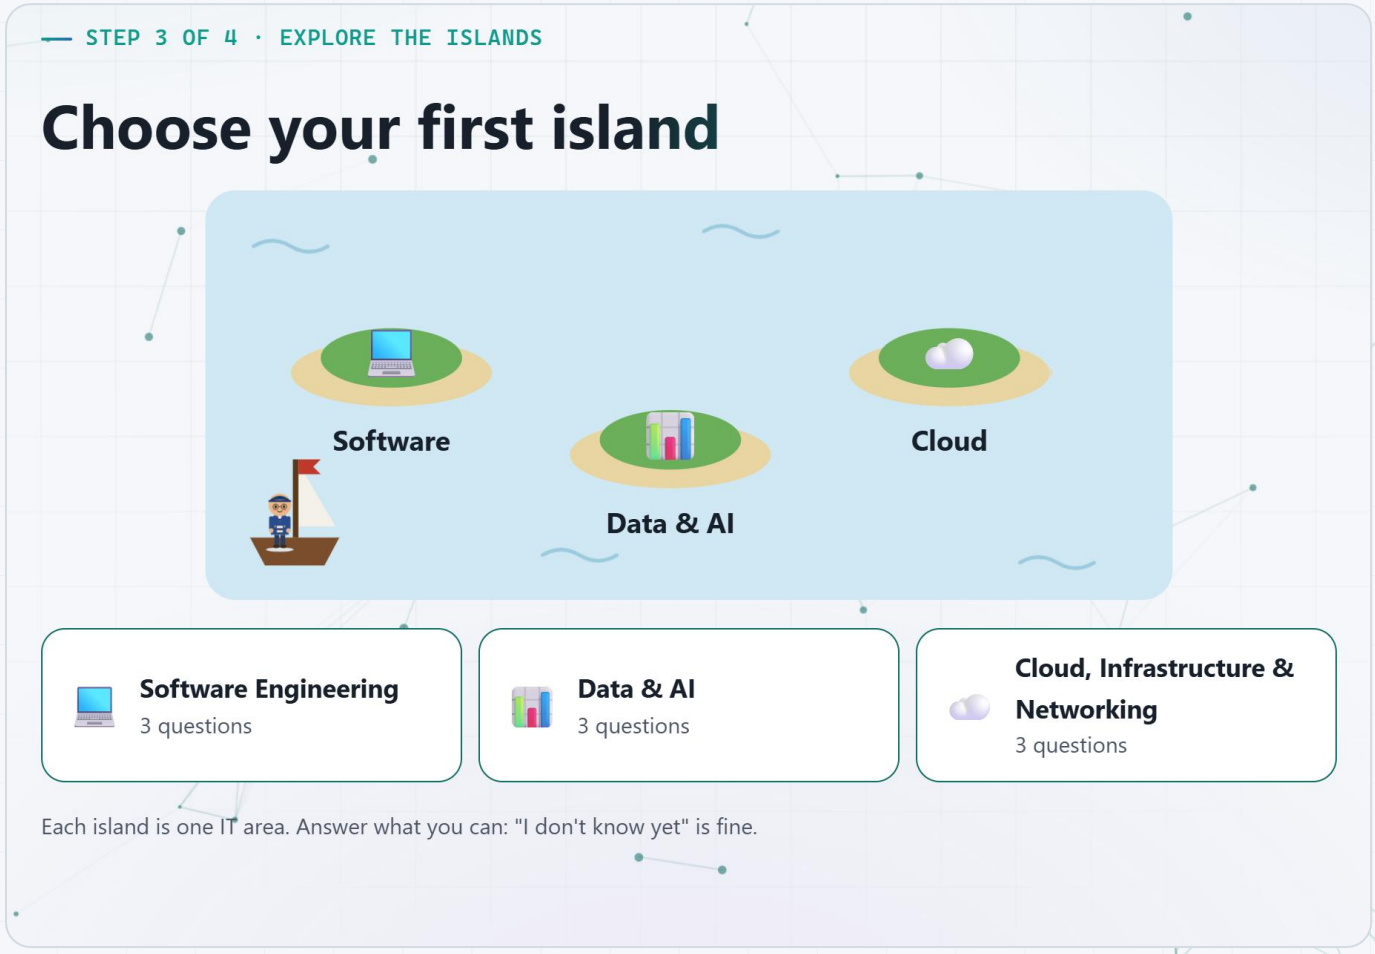

Future Skills

QUICK CHECK BEFORE IT COUNTS AS DONE

Introduction to Programming and Computer Science - Full Course

5 questions on this topic. Get 4 right to clear it. Each right answer earns 🪙 10; all 5 earns 🪙 30 more.

Concept check

1. Which statement best describes what an algorithm is?

- A A type of error that stops a program from running.
- B A programming language used to write web pages.
- C A computer's physical processor chip.
- D A step-by-step set of instructions to solve a problem.

Basics

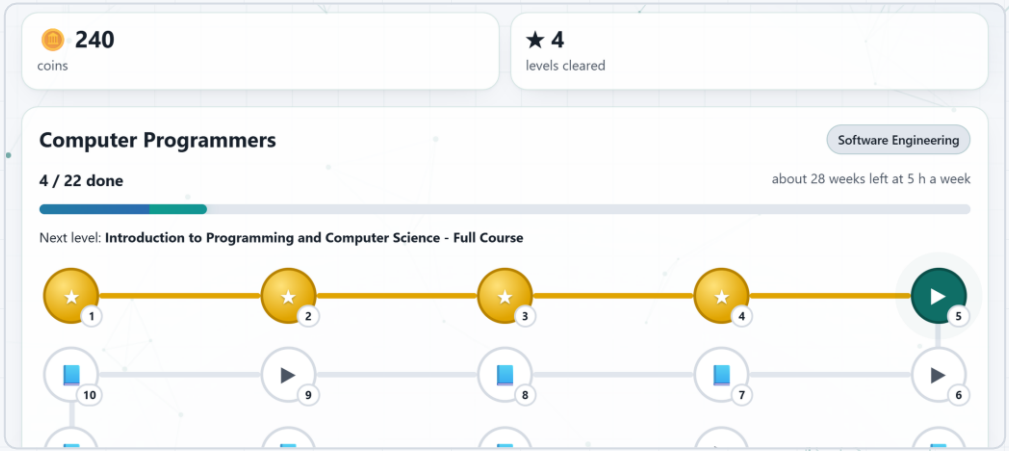

2. What is the main job of a variable in a program?

- A To make a program run without any input.
- B To repeat the same code many times automatically.
- C To store a value that can be used and changed later

Validation

4 / 5

right answers to clear each course

AI writes fresh questions

Try 1

Variables and types

2. What does this code most likely store in age?

```
int age = 20;
```

A. A list of numbers.

B. A whole number value.

C. A text string value.

Try 2

Variables

2. What does a variable do in a program?

A. It always prints text to the screen.

B. It makes the computer faster automatically.

C. It prevents all programming errors.

D. It stores a value that can change while the program runs.

— BUSINESS MODEL

Schools pay us

SaaS → B2B

High schools and universities

Connect 1 uni → reach all its students

PRICE (OUR ESTIMATE)

RM 15 / student / year

[R8] RESEARCH NEEDED

1 uni × ____ IT students × RM 15 = RM ____ / year

— COMPETITORS
